EXPERIENCE:

Software Developer at JustPlus (July 2022 – Present):

1. **Landing Page Creation:**

Developed and designed landing pages in Elementor/WordPress based on Figma designs, ensuring visual fidelity and functionality.

2. **Page Development:**

Created and revamped web pages using JavaScript, PHP, WordPress and HTML/CSS, enhancing the user experience.

3. **Responsive Design Implementation:**

Optimized web pages to be mobile-friendly, ensuring compatibility and a seamless user experience across various devices using JavaScript, PHP and HTML/CSS.

4. **Back-End Development for Mobile Application:**

Developed backend functionalities in PHP for mobile application. For instance, I have implemented functions to manage and send notifications to users. One such function involved inserting notification records into database, ensuring data integrity and efficient notification management, Utilized tools like Postman for testing and verifying API endpoints.

5. **Template Development:**

Designed and coded responsive email landing pages using HTML/CSS, ensuring cross platform compatibility and enhancing email marketing efforts.

Technical Writer at 1and1 (May 2022 – November 2022):

1. **Task Management and Execution:**

I was assigned tasks via the Jira Platform, focusing on testing and modifying HTML code for email templates.

2. **Email Template Verification and Troubleshooting:**

Ensured that email templates displayed the correct content and resolved errors, such as issues preventing the emails from being sent.

Customer Service Support at Sykes (August 2021 – November 2021):

1. **Customer Issue Resolution:**

Provided support(Italian, English) for customers experiencing issues with mobile applications, phone/laptop setting, Wi-Fi configuration and more.

2. **Problem Analyzing and Troubleshooting:**

Analyzed and troubleshooted problems, aiming to resolve issues promptly and effectively on the spot.
